

Job Title: Senior Backend Engineer (Python)

Location: Remote (US/Canada)

Type: Full-time

About the Role:

We are looking for a Senior Backend Engineer to join our core platform team. You will scale our data pipelines, design robust APIs, and collaborate closely with our frontend team to build high-performance web applications.

Required Technical Skills:

- 5+ years of experience with Python (Django or FastAPI)
- Strong experience with PostgreSQL and database optimization
- Proven track record with AWS cloud infrastructure (EC2, S3, RDS)
- Experience with Docker and CI/CD pipelines (GitHub Actions)
- Familiarity with Kubernetes is a huge plus

Soft Skills & General Requirements:

- Strong problem-solving abilities and clear communication
- Ability to mentor junior engineers and conduct code reviews
- High ownership mindset and comfort with ambiguity
